

Georgia Tech Marine Robotics Group is a team of undergraduate and graduate students from the Aerospace Systems Design Laboratory (ASDL) at Georgia Tech. We are developing autonomous vehicles and software to compete in RoboNation's RoboBoat, RoboSub and RobotX competitions. We won first place at RoboBoat in 2016, and qualified for the semi-finals at RoboSub and RobotX the same year. These competitions are a great way to get students excited about robotics and marine engineering, and we're always thrilled to go there. Our team motto is "Everything is broken", as we never had one competition without a broken sensor or motor, so we are always prepared and we never quit!
