

IMARC Team Bio

IMARC is an official University of Iowa College of Engineering Student Organization. Our goal is to provide students with the tools necessary to get jobs in their respective industries. Our club consists of students of Mechanical, Computer, and Civil Engineering. We also have members of the Computer Science and Mathematics colleges. Our club consists of 3 teams: Hull & Propulsion, Hardware, and Software. The Hull & Propulsion team has the most members, a majority of them being mechanical engineers. They're job is to design the hulls and propulsion units just as their name implies. The Hardware Team works with the electronics and the software team works on the coding. Unfortunately due to our club being new, this is our second year, we have few members on the hardware and software teams. Only 1 is on the hardware, while 3 are on the software.
