

## The Water Dogs Team Bio

We're The Water Dogs, a community based Robo-boat team in Oviedo, Florida. Our team is comprised of local high school and recently graduated students with a passion for STEM and robotics. They are members of a larger robotics program that allows them to become well rounded in all aspects of competition and many of them have competed in other challenges such as FIRST Tech Challenge or VEX Robotics. Our crew consists of Zach Irving, Nicholas Injo, Jared Reid, Edgar Madruga, Haven Carter, Sachin Shah, Asheya Naik, Katherine Guise, Neel Maity, and Aashni Patel. We are mentored by Mr. Don Harper, Mrs. Po Dickison, and Mrs. Jaynelle Miller. Our boat, Sir Docks-A-Lot, sets sail for the second year in a row with numerous design improvements and innovations. We are excited to meet new teams and see their boats this year. Last year we placed second overall and won the speed challenge, and hope to improve and learn as we compete this year.
